

## IX Международный блицтурнир по английскому языку «Радуга» 5-6 классы

Время проведения: 28 января — 7 февраля 2019 г.

В вопросах с вариантами ответов следует выбрать верный вариант и обвести его карандашом или ручкой. Для вопросов с открытым ответом нужно дать краткий и четкий ответ (слово).

Участник \_\_\_\_\_

Прочитайте текст, ответьте на вопросы после текста и запишите цифру правильного ответа.

### How to Predict Weather.

Here are some tips for weather prediction. Watch animals. They are very sensitive to atmospheric pressure and they are very good as weather predictors. For example, insect-eating birds usually fly higher in good weather, but they often fly lower if a storm is approaching. Watch a fire. If fire smoke rises steadily, the weather is going to be fine. If it turns or comes closer to the ground, a storm or snow is approaching. Watch nature. When wet weather is on the way, sounds are heard more clearly. The smell of flowers and other plants becomes more distinctive before the arrival of rain. A grey evening sky means that rain is going to happen.

- tip — подсказка
- prediction — прогноз, предсказание
- to approach — приближаться
- pressure — давление

**№1.** The insect-eating birds usually fly higher if the weather is fine.

- 1) true      2) false      3) not stated

**№2.** The blue evening sky means that the next day is going to be sunny.

- 1) true      2) false      3) not stated
